

THE DOCTOR IS COMING TO SPEAK ON YOUR CAMPUS SOON! DON'T MISS IT!

YOU'VE HEARD OF PHEROMONES, NOW TRY...

PHEROTONES™

RING IN THE SEXUAL ATTRACTION.

EXPERIENCE THE SECRET DISCOVERED IN DENMARK THAT'S TOO HOT FOR MAINSTREAM SCIENCE.

Dr. Vanderhood

Mankind invented science over one hundred years ago to better understand the world, and especially what turns people on. That journey has led

us to the next frontier in human sexual attraction. We call them Pherotones, amazing ringtones that attract.

DR. VANDERHOOD ANSWERS ALL OF YOUR QUESTIONS.

Q. Are Pherotones dangerous?

A. Yes, they can spark untamed passion, which is always a rocky road. I advise common sense at all times.

Q. How do they work?

A. I believe that Pherotones work via resonations that stimulate the brain stem.

Q. How can I find out more?

A. Easy! Just visit www.pherotones.com. It is all there waiting to be discovered.

Do small woodland creatures use Pherotones when dating?

Dr. Myra Vanderhood believes that Pherotones occur in nature. It is quite possible that animals use these microsounds to attract mates during rutting season. Until now, science has known very little about the use of sound in the courtship rituals of the animal kingdom.

"Now that I'm using Pherotones my dating life is off the hook. Get it?"

-Anna, Philly

Pherotones trigger neural pathways that incite pleasure zones of the body.

"NOW I WANT TO SHARE THIS FEELING WITH YOU."

Dr. Vanderhood

Dr. Myra Vanderhood, founder and Chief Technology Officer of Pherotones.com, says, "I believe that there are Pherotones everywhere in nature. Birds, beasts,

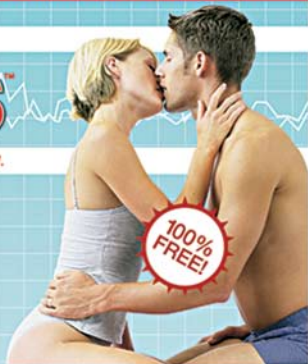

insects and members of the fish kingdom: Each have their own unique ways of attracting mates. Now humans can have what animals have enjoyed for centuries. Help me put this attraction magic in ringtones for the good of science and all mankind.

"Before Pherotones, I wasn't much of a ladies' man. Now they call me Mr. Lady."
-Derrick, NYC
